SUMMARY

Full-stack engineer with 2+ years shipping web and mobile apps at early-stage startups. Comfortable owning features end to end, from React Native and Next.js frontends to Python backends on AWS. Currently building LLM-powered products with the Claude API. Looking for a high-ownership role at a small, product-driven company.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend & Mobile: React, Next.js, React Native (Expo), Redux, Vue.js, Tailwind CSS, NativeWind

Backend & Cloud: Node.js, FastAPI, REST APIs, AWS (ECS, EC2, S3, DynamoDB, Cognito), Firebase, MySQL, Vercel

AI / LLMs: Claude API (messages, vision/OCR), prompt engineering, LLM app development, OpenAI TTS

Tools: Git, Docker, Jest, ESLint, Agile/Scrum

WORK EXPERIENCE

Software Engineer | Tenaflī | Remote, USA

Dec 2023 - Present

- Built and shipped the [Tenaflī](#) and Tenaflī Pro mobile apps (React Native, TypeScript) for a home services marketplace, including SSO auth with AWS Cognito, gift cards, deep linking, push notifications, image uploads, and job completion tracking.
- Developed the Tenaflī website (Next.js, TypeScript) and backend REST APIs in Python/FastAPI, deployed on AWS (ECS, S3, DynamoDB, EC2).
- Led frontend development for [Henrie](#), an AI-powered financial coaching platform: built the [React Native app](#) and Next.js marketing site, plus a shared TypeScript component library and design system used across both.
- Currently building the [Agefully AI app](#) and [website](#) (React Native, Next.js, TypeScript, Python/AWS), a daily wellness product for seniors. Own the frontend end to end on a team of 2-5 engineers.
- Adapted to a backend migration from microservices to a monolith, updating frontend API contracts, data fetching patterns, and deployment workflows along the way.

Software Engineer (Open Source) | One Community | Remote

Oct 2023 - Dec 2023

- Contributed frontend features to Highest Good Network, an open-source React/Node.js web app. Fixed critical bugs and improved code quality with Jest unit tests and ESLint.

PROJECTS

FluentRead: AI English Pronunciation Coach | fluentread.app | [GitHub](https://github.com)

2026

- Built and launched a web app that helps non-native English speakers practice pronunciation. Users paste text or upload a photo of a page (OCR with Claude vision), read it out loud, and get feedback from Claude with a score, per-word tips, and correct pronunciation audio via OpenAI TTS.
- Handles long readings (10-30 min) with an auto-restarting Web Speech API loop and records audio for replay. Long transcripts get split into chunks and analyzed in parallel by Claude, then merged into one report. Next.js 14 and Tailwind on Vercel, with API keys kept server-side.

OnePercent: Daily Growth Tracking App | [GitHub](https://github.com)

2025

- Full-stack mobile app (React Native/Expo, TypeScript, Python) for recording voice or text messages to your future self with scheduled delivery. Built the voice recording, scheduled notifications, and file-based routing with Expo Router, plus a Python backend for storage and delivery scheduling.

EDUCATION

San Jose State University | B.S. Computer Science | GPA: 3.57

May 2023

CURRENTLY LEARNING

- AI Fluency (Anthropic Academy)** - working through Anthropic's AI Fluency: Framework & Foundations course.
- Building LLM apps with the Claude API, including prompt engineering and agentic workflows.
